LEED for Existing Buildings: Operations & Maintenance, September 2008 4 Introduction A sustainable building maximizes operational efficiency while minimizing environmental impacts. As a cutting-edge, consensus-based system for certifying green building performance, operations and maintenance, the LEED for Existing Buildings: Operations & Maintenance (O&M) Rating System provides a road map for property

[Operations & Maintenance Best Practices Guide: Release 3](#)

The intent of LEED for Existing Buildings: Operations & Maintenance is to certify the operations and maintenance of the building and create a plan for ensuring high performance over time. The rating system captures both a building's physical systems (equipment, design, land use, etc.) and the way the building is occupied and operated by its managers (waste management, temperature monitoring, commuting programs, etc.). A key goal of LEED for Existing Buildings: Operations & Maintenance is ...
